New York, May 19.—Cotton futures closed barely steady; May 9,27c, June 9,15c; July 9,12c; Aug. 8,87c; Sept. 8,38c; Oct. 8,18c; Nov. 8,13c; Dec. 8,11c; Jan. 8,13c; Feb. 8,11c. Spot cotton closed easy; middling uplands 9\forall c; middling Gulf 9\forall c; sales 1,70c bales. The market opened steady in tone, with present crop months unchanged to 4 points ingher and new crop options 1 to 2 points lower. Immediately after the call prices caused off to 9,18c for July and to 8,25c for Aug. under estimate for large port receipts, apparent absence of orders in the hands of the commission brokers. English cables afforded no incentive either way, giving futures at net 3s to 1\(\frac{1}{2}\) points higher and spot cotton as 1-25d higher in Liverpool. There were no orders of importance from abroad. The West seemed to be content with its purchases of cotton for the present. Wall street appeared as a bayer, however, and ring shorts had to cover. July was quickly bid up to 9,25c and Aug. to 8,55c, at which level profit-taking by smaller holders once more set in and forced the whole list off again. July dropped 4 points and Aug. 50 points from the previous figures. Conservative operators seemed disposed to withdraw from the market, as a matter of precaution pending the settlement of the coal strike and a better knowledge of the intentions of the New Oriesus bull interests. The crop and weather reports were bearish, showing fair conditions over the certific belt, except a few stations in the strike large profit states. For Monday Houston estimated receipts were 50 to 60 bales, against 1,54 hours against 1,54 hours against 1,55 ho mated receipts were 500 to 600 bales, against 1,534 bales last week and 2,277 bales same day last year.
